

With our software that simplifies, savvy support team and scalable solutions, hundreds of health sciences programs trust CORE to help manage their experiential/clinical education and student assessment and career readiness needs

WHAT SCHOOLS TELL US

"Our current provider doesn't meet our needs, but we don't have the time to transition at the moment."

"Our budget is not in a place for us to explore new options right now."

"The customer service of our current provider does not meet our needs and is slow to respond to our issues and requests."

"Our current system is not intuitive or user-friendly for our admins, students, and preceptors to use."

"We need a software provider that truly understands the needs of our department first-hand."

"We end up paying added fees to our current provider because they charge extra for certain things."

"Our program is very unique, and most software does not meet the level of customization needed."

HOW CORE WILL HELP

90% of clients agreed in a survey that switching to CORE was not difficult! We have perfected our process over 14 years to ensure an **easy** transition at **whatever pace** works best for you. We do ALL the heavy lifting to configure your data, train your admins, and provide continuous daily support.

We strive to ensure the **benefits** always outweigh the cost. No 2 programs are the same, so we offer a wide variety of contract options. Plus we **never** charge extra fees for customer support, upgrades, or new development requests!

The feedback we hear most from our schools is that no other provider compares to the high level of CORE's **personalized**, one-on-one client support that is available to you as often as needed. Every year, we achieve a client retention rate of **98%** or higher!

Over **55%** of clients said that "**ease of use**" is the main reason they switched to CORE. We also offer a mobile app to make things easier for students. And there are many functions preceptors can complete through **automated** emails without even having to log-in!

We were founded by a preceptor who **personally** experienced the challenges admins, students, and preceptors were facing. Multiple clinicians on staff ensure that our team becomes a **knowledgeable** and **reliable extension** of your own program.

CORE **does not charge** an extra fee for data transition, implementation, product training, unlimited daily client support, software upgrades, development requests, or new features!

We work with over 15 different types of health science programs, as well as many types of non-health science programs. Our platforms are very **customizable** to your specific needs.
