Testimonials

OT Schools Are Loving CORE's Integration With Formstack To Easily Complete FWPEs!

This new integration was specifically developed to support CORE's growing client list of Occupational Therapy programs as they adjust to new Fieldwork Performance Evaluation (FWPE) guidelines mandated by the American Occupational Therapy Association (AOTA).

The CORE ELMS/Formstack integration has gone very well. The CORE team did an excellent job of making it work very similarly to how I was previously sending the OT FWPE out to my fieldwork educators.

Before CORE ELMS integrated with Formstack, I had plenty of negative emails from my fieldwork educators. But since the integration has gone live, it has been blessedly quiet!

The biggest plus is that now there is a 'Plan B' for Fieldwork Educators to complete and return the FWPE. When using Formstack before the CORE integration, the only way that a Fieldwork Educator could access it was through a link that I had to set up. This caused numerous problems. Now that CORE has integrated with Formstack, the fieldwork educator has the option to access it through the link OR they can simply log into CORE and complete the evaluation there."

Since the integration has gone live, it has been blessedly quiet!

The new CORE ELMS/Formstack integration is going to be a huge help to our OT program because we are now able to have FWE's fill out the new evaluation forms directly within our CORE ELMS system. This also now gives our students access to their evaluation without my assistance.

Moreover, the product development team at CORE has been incredibly helpful in listening to our feedback and ensuring this evaluation integration feature will make the process easier for all OT programs. I am excited for others to try it!"
